Virtual Podiatrist

Virtual Podiatrist and Your Foot Pain are websites that feature unique, user friendly diagnostic tools designed to drive patients to your practice.

Share your link to Virtual Podiatrist with your referral network and help them diagnose their patient's foot complaint, recommend a referral to you, and print out relevant foot health information with your practice branding.

Alternatively, through your own embedded Your Foot Pain tool, the general public can go online and check the possible cause of their foot pain. This provides consumer level foot care information from within a page on your existing website.
